

Pressure Mapping Systems

"Our findings suggest that clinicians should incorporate the use of pressure mapping into their clinical practice to guide them in the process of wheelchair cushion selection for people at high risk of developing pressure ulcers."

- Ana Allegretti, PhD
- David Brienza, PhD
- Margo Holm PhD, OTR/L

Improve Your Clients' Comfort and Function and Prevent Tissue Trauma

- **EASY TO SET UP.** It's incredible how easy and intuitive FSA is to use. Quickly Scan or record client pressure mapping data easily into one file over time. Or take advantage of the FSA Seating Protocol Wizard that helps guide you through the use of FSA as part of a seating evaluation.
- **EASY TO SHARE.** Add a Netbook computer to FSA and you have a lightweight and portable system. It's easy to review, select and compile a report you can share with others as a colour print, Word document or PDF.
- **EASY TO FIND HELP.** When you call our free 1-800 Technical Support you get assistance from a person who knows how to help and solve your problem. You also get free software upgrades to help you take advantage of the latest FSA technology. Each FSA system arrives complete with software, electronics, SoftFlex sensing mats (our thinnest, most flexible and durable mats) and a calibration kit so you can start fast and stay up to date.
